

Products and Equipment

Have an understanding of cleaning products and equipment we use on a daily basis

Products and Equipment

- We use a lot of different products and devices to get our work done. This subject will introduce each one of them to you. As required and based on your responsibilities, more detailed and 1 on 1 training will also be provided. We'll keep this Subject updated, so you'll be notified if we add anything new to our toolbox.

01

Our Products

Our Products

01

We pride ourselves on using strictly non-toxic cleaning products.

02

This is to ensure that there is no harm to those who are using the products (us!)

03

... and there is absolutely no environmental impact.

04

We use a variety of cleaning products for all of our cleaning needs.

05

Green Wheel Cleaners is:
Non-toxic Commercial
Cleaning

**Green
Wheel
Cleaners**

All Purpose Cleaner:

Gentle Earth All Purpose Cleaner possesses microbial, antiseptic, antifungal, antibacterial, and mold-retardant properties. The fact that it smells like Christmas is just a bonus!

What we use it for:

All surfaces **except** glass

Greasy surfaces

Removing fingerprints from desks and other surfaces

Oxivir Plus:

Oxivir Plus is a one-step disinfectant based on proprietary Accelerated Hydrogen Peroxide (AHP®) to deliver fast, effective cleaning performance. Scent-free, antibacterial, antifungal. Breaks down into water and oxygen after use. Not irritating to the eyes or skin.

What we use it for:

Any surface that requires disinfecting (desks, chairs, bathrooms)
Mirrors (does not leave streaks)

Oxivir

Viper

A concentrated, no-rinse food contact sanitizer based on proprietary hydrogen peroxide (AHP[R]) technology. Environmentally responsible.

What we use it for:

Use to clean food contact surfaces
Any surface that requires disinfecting
(desks, chairs, bathrooms)

Bottles of Concentrate

From Concentrate:

All of our cleaning products are made from concentrate.

How to Mix:

Make sure your cleaning bottle is completely empty.

This will throw off the proportions if it is not empty.

Put a single pump of concentrate into the bottle, filling up to the taped area. Fill the rest of the bottle with water.

Keep in mind, if you feel like there is not enough concentrate in the bottle, do not put more in. All of the products are **very** concentrated.

02

Our Equipment

Our Equipment

We use a variety of different types of cleaning equipment to ensure we can accomplish each job and go above and beyond what our clients expect from us.

Shelf where most equipment is kept

Shelf where most equipment is kept

Equipment for Regular Office Cleaning

Here is a list of basic cleaning equipment that you will need for your first day.

Toothbrush

used to clean around
sinks and faucets

Magic Eraser

used to clean the
inside of sinks

Scour pads

for those bits of grime
that just won't come off

Vinyl gloves

worn at all times

Cloth bags - for clean and dirty cloths

Clean bag: Used to transport clean cloths from the office to the workplace.

Dirty bag: In this, we place all the cloths and gloves used during the shift.

Caddies: This bag is very useful to organize and carry our work utensils while we carry out the activities.

Cloth bags

Microfiber cloths - put into clean cloth bag

Microfiber is positively charged, which attracts negatively charged dust particles like a magnet. This makes it more effective (and safer) than a regular cloth and chemical spray for dusting. And what's even better, you just need to rinse it off when you're done to release all the dust and then you can use it wet, making them the best cleaning cloths for everyday use.

Microfiber cloths and mop pads

Equipment

Feather Duster

Electronics

Duster

for dusting high and low
areas

Equipment

Mop / Mop pad

For mopping all types of surfaces without carpet

Vacuum

allows us to clean in detail all surface time removing with suction (floors with or without carpets)

Vacuum bag

Just in case you need to change it.
